

GAYATRI SABAT

Mumbai, India

gayatrisabatt@gmail.com — +91 9890740720 — Portfolio — LinkedIn — GitHub

OBJECTIVE

Computer Engineering student with strong foundations in backend development, Python, JavaScript, and problem-solving, with experience building AI-powered and data-driven applications. Skilled in developing full-stack projects using Flask, FastAPI, React, Firebase, and databases. Passionate about AI systems, coding challenges, and creating scalable solutions while contributing to next-generation intelligent technologies.

EDUCATION

Bachelor of Engineering in Computer Science & Data Science

Present – 2027

Vidyavardhini's College of Engineering and Technology, Mumbai

CGPA: **9.12 / 10**

Higher Secondary Certificate (HSC)

2023

Percentage: 75.5%

Secondary School Certificate (SSC)

2021

Percentage: 82.80%

SKILLS

Programming Languages	Python, JavaScript, C++, SQL
Backend Development	Flask, FastAPI, Node.js, Express.js, REST APIs
Frontend Development	React.js, HTML, CSS, JavaScript
Databases	MySQL, MongoDB, Firebase Firestore
AI / Data Skills	Data Analysis, Rule-Based Systems, ML Basics, Data Visualization
Tools & Platforms	Git, GitHub, Docker, AWS, VS Code, Netlify
Other Skills	Problem Solving, Technical Writing, Debugging, API Integration

PROJECTS

WalSmart – Smart Retail Management System

(React.js — ML — Visualization)

- Developed a smart retail management prototype focused on inventory optimization and supply chain monitoring.
- Designed dashboards for demand prediction, inventory health tracking, IoT monitoring, and sustainability analytics.
- Built data visualization components to represent retail metrics and improve decision-making workflows.
- Collaborated in Sparkathon to solve real-world retail supply chain challenges.

FinLearn – Financial Literacy Platform

(React.js — Flask — Firebase)

- Developed a financial literacy application with personalized learning workflows and interactive guidance.
- Built backend APIs using Flask for authentication and user management.

- Integrated chatbot functionality and Firebase database services for dynamic content handling.
- Focused on scalable architecture and clean API integration practices.

Safar – Smart Packing Assistant

(JavaScript — Flask — Firebase)

- Developed a rule-based travel packing assistant that generates personalized packing checklists.
- Implemented recommendation logic using trip duration, weather, traveler count, and destination details.
- Designed backend workflows for trip storage and checklist management.
- Built responsive interfaces and optimized user interaction flows.

StudyBuddy – Productivity Tracker

(JavaScript — MySQL)

- Developed a task management application with CRUD functionality and categorization features.
- Designed structured database workflows using MySQL.
- Implemented responsive UI and optimized data retrieval operations.

TECHNICAL EXPERIENCE

- Practiced problem-solving using Python and C++ through coursework and project implementation.
- Worked with APIs, debugging workflows, and backend integration across multiple projects.
- Created technical documentation and reports for collaborative development work.
- Explored AI and Generative AI concepts through workshops, hackathons, and hands-on projects.

CERTIFICATIONS

- Microsoft Certificate in AI & Azure
- Introduction to Generative AI – upGrad
- Google AI Workshop Certificate
- Data Science & Deep Learning Program
- Python Fundamentals – Microsoft Learn
- Python Programming – Internshala
- React.js – Scaler
- C++ Programming – Great Learning

ACHIEVEMENTS

- Participated in Walmart Sparkathon for solving retail supply chain challenges
- Team Leader at Mumbai Hacks 2025
- Participated in AI, cloud, and developer community events including DevFest 2025
- Built multiple full-stack and AI-assisted academic projects

POSITION OF RESPONSIBILITY

Corporate Associate – Microsoft Learn Student Club (MLSC)

Led outreach initiatives, coordinated technical events, and promoted learning in web development, cloud computing, and AI technologies.
